***Statistical Bulletin** is a monthly publication of the National Bank of Serbia consisting of two main sections: graphic presentation of economic developments in the Republic of Serbia with a brief comment and the statistical survey.*

The statistical survey comprises monetary and balance of payments statistics derived from data collected and processed by the NBS as well as statistics on the real and fiscal sectors derived mainly from data of the Republic Statistical Office and the Ministry of Finance.

From 1999 onward, data are shown at annual level, whereas a majority of tables also contain monthly figures for the last 24 months.

General methodological explanations and notes are given on final pages of the publication.

Symbols used in tables:

... not available

* adjusted

θ average

In some tables, the totals shown can differ from the sum of items as a result of roundings.

Notes:

Data series are available on NBS website at: <http://www.nbs.rs/internet/english/80/index.html>

Current Developments

Chart 1
Weighted average interest rates
(p. a., in %)

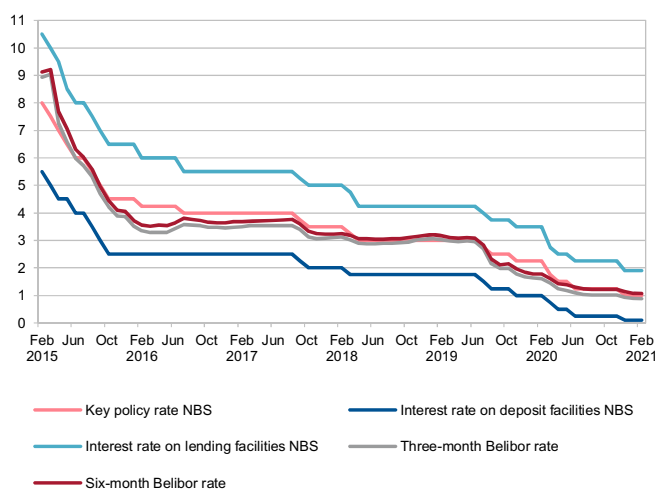

Chart 4
Domestic loans to the non-monetary sector and M3
(nominal y-o-y rates, in %)

Chart 2
Interest rates on new dinar loans and deposits
(weighted average values, p.a., in %)

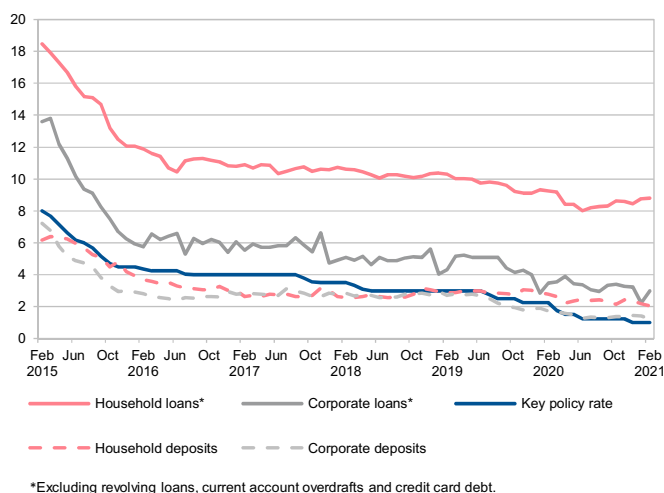

Chart 5
Dinar exchange rate
(average 2005 = 100)

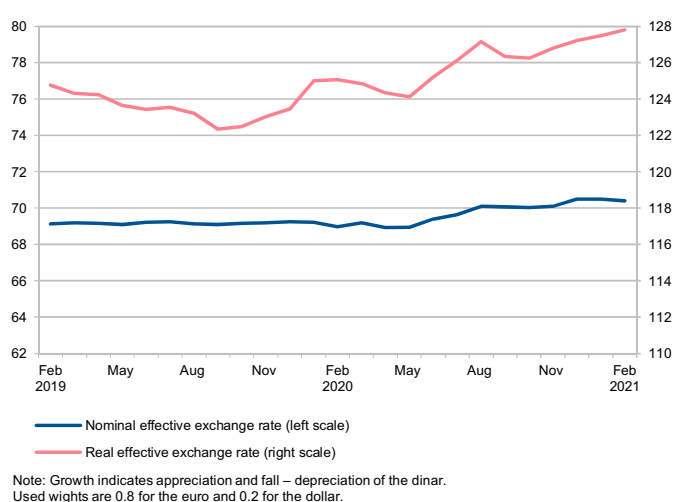

Chart 3
Interest rates on new euro and euro-indexed loans and deposits
(weighted average values, p.a., in %)

Chart 6
Country's foreign exchange reserves
(end of period, in EUR mn)

Chart 7
Exports and imports
(2008=100)

Chart 10
GDP projection
(y-o-y rates, in %)

Chart 8
Industrial production
(average 2020 = 100)

Note: The method X-12 ARIMA is used for decomposition.

¹⁾ The increase in foreign currency claims of the NBS is the result of the acquiring of these claims based on the distribution of the bankruptcy funds. National Bank of Serbia, on the basis of law and contracts, performs activities for the Republic of Serbia, such as the management of dinar and foreign currency accounts, fiscal agent activities and implementation of tasks related to withdrawal of funds and repayment of foreign liabilities.

NOTES:

For the period prior to January 2002 claims and liabilities in respect of the republics of the former SFRY are included in foreign claims and liabilities. Transactions with the republics of the former SFRY have been excluded from calculations since January 2002.

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

December 2016–February 2019 data were revised in April 2019 due to the reclassification of loans in case of one bank, resulting in a lower stock of liquidity and current assets loans and other loans, and a higher stock of investment loans.

¹⁾ Since May 2004 required reserves are shown in terms of their calculated values.²⁾ As of May 2004, required reserves are not allocated to a separate account but form a part of the giro account. For the calculation of excess reserves, giro account balances in column 6 have been reduced by the amount of calculated required reserves.³⁾ Until September 2010 Statistical Bulletin, funds approved to the Republic of Serbia by the IMF under SDR allocation (August, September 2009) were included in the National Bank of Serbia's capital and deducted from Other liabilities. As of September 2010, these funds are fully excluded from the NBS balance sheet and the data series are shown without them.

NOTE:

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

LIABILITIES

NOTES:

As of January 2002 four large state-owned banks whose licences were revoked as well as banks undergoing liquidation for a number of years (38 banks) were excluded, but their positions from the last month of operation were repeated in subsequent balance sheet statements.

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

¹⁾ Since January 2018, it is possible to record claims indexed to the NBS key policy rate and BELIBOR interest rates within the category "Other contracted hedge", earlier recorded within the category "Without contracted hedge".

NOTES:

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

¹⁾ Since January 2018, it is possible to record claims indexed to the NBS key policy rate and BELIBOR interest rates within the category "Other contracted hedge", earlier recorded within the category "Without contracted hedge".

NOTE:

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

LEGEND:

Sector A Agriculture, forestry, fishing

Sector B Mining

Sector C Processing Industry

Sector D Distribution of electricity, gas, steam and air conditioning

Sector E Water supply, waste water management, waste disposal control and similar activities

Sector F Construction

Sector G Wholesale and retail trade, repair of motor vehicles and motorcycles

Sector H Transport and warehousing

Sector I Food and lodging services

Sector J Information and communications

Sector L Real estate activity

Sector M Professional, scientific, innovation and technical activities

Sector N Administrative and supporting service activities

Sector P Education

Sector Q Health and social care

Sector R Art, entertainment and recreational activities

Sector S Other service activities

NOTES:

Table shows data as of August 2010 due to entry into force of a new Decree on the Classification of Activities.

Quarterly data for prior months, shown according to the prior classification of activities, are available on NBS website at: <http://www.nbs.rs/internet/english/80/index.html>.In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the pertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to non-financial corporations take up a larger share in total loans compared to the previous years.

Dinar and FX-indexed savings and term deposits				Foreign exchange deposits											Total enterprises (11+22+33)	
Sectors P and Q	Related public enterprises and companies not included in consolidation	Related public enterprises and companies included in consolidation	Total (12 to 21)	Sector A	Sectors B, C and E	Sector D	Sector F	Sector G	Sectors H, I and J	Sectors L, M, N, R and S	Sectors P and Q	Related public enterprises and companies not included in consolidation	Related public enterprises and companies included in consolidation	Total (23 to 32)

NOTES:

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

Short-term dinar and FX-indexed claims							Short-term foreign currency claims							Total short-term claims (7+14+21+28)	
On interest and fees

NOTES:

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the pertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

Long-term dinar and FX-indexed claims				Long-term foreign currency claims								Enterprise shares	Total long-term claims (7+14+21+22+29+30)	Total claims (tab. 1.1.10 col. 29 + tab. 1.1.11 col. 31)	Provisioning against losses			
On interest and fees			Enterprise shares	Credits											Enterprise shares	on total claims on enterprises (tab.1.1.10 and tab. 1.1.11)		on total claims on households (tab.1.1.10 and tab.1.1.11)
Households	Non-profit and other organizations	Total (15 to 20)		Other financial organizations	Local government	Public enterprises	Companies	Households	Non-profit and other organizations	Total (23 to 28)

¹⁾ Since January 2018, it is possible to record claims indexed to the NBS key policy rate and BELIBOR interest rates within the category "Other contracted hedge", earlier recorded within the category "Without contracted hedge".

NOTES:

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

LEGEND:

Sector A	Agriculture, forestry, fishing	Sector I	Food and lodging services
Sector B	Mining	Sector J	Information and communications
Sector C	Processing industry	Sector L	Real estate activity
Sector D	Distribution of electricity, gas, steam and air conditioning	Sector M	Professional, scientific, innovation and technical activities
Sector E	Water supply; waste water management, waste disposal control and similar activities	Sector N	Administrative and supporting service activities
Sector F	Construction	Sector P	Education
Sector G	Wholesale and retail trade, repair of motor vehicles and motorcycles	Sector Q	Health and social care
Sector H	Transport and warehousing	Sector R	Art, entertainment and recreational activities
		Sector S	Other service activities

NOTES:

Table shows data as of August 2010 due to entry into force of a new Decree on the Classification of Activities.

Quarterly data for prior months, shown according to the prior classification of activities, are available on NBS website at: <http://www.nbs.rs/internet/english/80/index.html>.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the pertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

December 2016–February 2019 data were revised in April 2019 due to the reclassification of loans in case of one bank, resulting in a lower stock of liquidity and current assets loans and other loans, and a higher stock of investment loans.

¹⁾ Since December 2014, the "Cash loans" category has been shown separately and is excluded from the "Other loans" category in the household sector.

NOTES:

Revolving loans, cash loans and payment cards are shown under other credit and other placements.

Due to the application of the new Decree on the Classification of Activities that entered into force in August 2010, significant changes were made in data series.

December 2016–February 2019 data were revised in April 2019 due to the reclassification of loans in case of one bank, resulting in a lower stock of liquidity and current assets loans and other loans, and a higher stock of investment loans.

NOTES:

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

NOTES:

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

NOTES:

In December 2014, the reclassification of institutional units was made. Based on sector tables presented on the NBS webpage – http://www.nbs.rs/internet/cirilica/20/index_stat.html, division has been made by institutional sectors in accordance with the European System of Accounts (ESA 2010).

As of December 2014, related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) have been distributed to the appertaining sectors in accordance with ESA 2010 and are no longer presented separately.

As of end 2014 the criteria for classifying companies as a public company or a non-financial corporation are the following: ownership, control and management. Therefore, at the end of 2014, loans to public non-financial corporations take up a larger share in total loans compared to the previous years.

Table 1.1.20

¹⁾ As of 1 September 2006, lending and deposit rates of the National Bank of Serbia are set at the level of key policy rate increased/decreased by a certain number of percentage points, as specified by the Decision on interest rates applied by the NBS in the implementation of monetary policy.

²⁾ Interest rate on Lombard loan is revoked since 11 May 2004. With the enactment of a new Decision on the conditions and manner of extending short-term loans against a collateral of securities, this interest rate was re-introduced and applied from April to 9 November 2005.

³⁾ From 10 November 2005 until 31 August 2006, the interest rate on Lombard loans was set at the level of weighted average repo rate increased by 3, 6 or 9 percentage points.

⁴⁾ Until 10 April 2002 shown were the interest rates charged on non-allocated and/or incorrectly calculated dinar required reserves, and in the period from 11 April 2002 to 17 September 2008, interest rates shown in columns 7 and 8 were those charged on non-allocated and incorrectly calculated dinar and foreign exchange required reserves. Beginning from the maintenance period 18 September–17 October 2008, interest rates on non-allocated and/or incorrectly calculated dinar/foreign currency required reserves have been shown in separate columns. Starting with 11.07.2015, interest rate on the difference between calculated and allocated and between prescribed and calculated foreign currency reserve requirement (RR) is calculated in relation to 3 month EURIBOR, which is formed on the day of interest, increased by 5 p.p., while on dinar currency reserve requirement (RR) interest rate, for the same base, is calculated in relation to NBS Key Policy Rate increased by 5 p.p.

^{4a)} A new Decision on Banks' Required Reserves with the National Bank of Serbia in Respect of Foreign Currency Balances Held by Leasing Companies in Special Purpose Accounts with Banks was enacted on 17 April 2010 ("RS Official Gazette", No. 12/2010). On 18 September 2012, this Decision was put out of force ("RS Official Gazette", No. 87/2012).

^{4b)} From 14 November 2014, entered into force new Decision on interest rates applied by the National Bank of Serbia in the implementation of monetary policy (allocated foreign currency required reserves in excess of the calculated amount) – by applying the interest rate equal to the three-month EURIBOR applicable on the date of interest calculation, plus 5 percentage points ("RS Official Gazette", nos. 45/2011, 98/2012 and 125/2014).

Lending interest rates										Deposit interest rates			
On incorrectly calculated dinar required reserves ¹⁾	On incorrectly calculated foreign currency required reserves ⁴⁾	On incorrectly calculated leasing required reserves ^{4a)}	On the amount of difference between the actual average daily balance of allocated foreign currency required reserves and the calculated amount of foreign currency required reserves in the maintenance period ^{4b)}	On the amount of daily liquidity loans ⁵⁾	On the amount of short-term liquidity loans ⁶⁾	On emergency liquidity assistance loans to banks in RSD ¹⁰⁾	On emergency liquidity assistance loans to banks in EUR ¹⁰⁾	The amount of credits and other lending that have not been repaid within the agreed or prescribed period ⁷⁾	On the above-zero difference between the prescribed and deposited amounts and between the correctly calculated and miscalculated amount that a bank is required to deposit with the NBS ⁸⁾	On the amount of average daily balance of allocated dinar required reserves ⁹⁾	On the amount of excess liquidity of banks with the NBS

¹⁾ Interest rate on daily liquidity loans was revoked on 10 November 2005 subject to the new Decision on Lombard loans. A new Decision on the conditions and manner of extending daily liquidity credits to banks against a collateral of securities was enacted on 3 June 2008 ("RS Official Gazette", No. 52/2008, 40/2010, 3/2011, 18/2011, 34/2013 and 8/2019).

⁴⁾ Emergency loans were abolished on 1 September 2006. As of 23 October 2008, a new Decision on Terms and Conditions of Extending Liquidity Loans to Banks ("RS Official Gazette", No. 96/2008) is in force, until 19 April 2012. As of 20 April 2012, a new Decision on Terms and Conditions of Extending Liquidity Loans to Banks ("RS Official Gazette", No. 31/2012 and 98/2012), until 10 July 2015 ("RS Official Gazette", No. 61/2015) is in force.

⁷⁾ The amount of credits and other lending that have not been repaid within the agreed or prescribed period, and/or that are used contrary to regulations. Starting with 11.07.2015, interest rate on the amount of credits and other lending that have not been repaid within the agreed or prescribed period, and/or that are used contrary to regulations – at interest rates determined by the law regulating the default interest.

⁸⁾ On 10 June 2009, the Decision on Adjusting Gross Household Lending to Share Capital of Banks was put out of force.

⁹⁾ Until April 2002, deposit interest rate was calculated by applying the prescribed interest rates on allocated required reserve funds. By way of exception, starting from 18 August 2020 the NBS also pays interest applying a "preferential rate" which is by 0.50 pp higher than the standard remuneration rate – if banks approved to their clients loans under the Guarantee Scheme at an interest rate at least 0.5 pp lower than the maximum rate envisaged by the Decree on the Guarantee Scheme (in accordance with the Decision on Interest Rates Applied by the National Bank of Serbia in the Implementation of Monetary Policy).

¹⁰⁾ Starting with 11.07.2015., on the amount of an emergency liquidity assistance loan granted in euros, the NBS shall charge interest – at the rate equal to the three-month EURIBOR on the value date of interest calculation, plus 5 percentage points. On the amount of an emergency liquidity assistance loan granted in dinars, the NBS shall charge interest – at the rate equal to the NBS key policy rate plus 5 percentage points.

NOTE:

In the months that witnessed changes in interest rates, the interest rates applicable at the end of those particular months were used.

¹⁾ From September 2010 to December 2014, "Other loans" of the household sector included cash and other loans. From January 2015, these two categories of loans are shown separately and "Other loans" refers to other loans only.

NOTE:

For years: weighted average interest rate for 12 months, except for 2010 where weighted average interest rate is given for the last four months of the year and 2012 where January is missing from the weighted average interest rate in columns 5, 6, 7, 9, 10, 11, 13, 14, 15, 30, 31, 32, 34, 35, 36, 38, 39 и 40.

¹⁾ For years: weighted average interest rate for 12 months, except for period 1997-2000 where data are from December.

NOTE:

As the Guidelines for the Submission of Data on Lending, Deposit and Fee Rates of 28 October 1998 ceased to be valid on 1 July 2011, the last update of the table will be that of June 2011.

¹⁾ Prior to 31st January 2005 NBS conducted open market operations through outright sale of NBS bills, whereas as of 31st January 2005 such operations are conducted through 2W repo sale of securities. From 18th July 2012 to 19th December 2012 NBS conducted 1W repo purchase of securities and from 19th December 2012 NBS has been conducted 1W repo sale of securities.

²⁾ The weighted yields on bonds issued against frozen foreign currency savings deposits were obtained by weighting the yield that corresponded to the prevailing price at the close of the business day.

³⁾ In 2020 the auctions of sale of dinar government securities are organized with maturity of 5.5Y.

⁴⁾ In 2000, NBS bills were sold only during November.

¹⁾ Indexes above 100 mean appreciation and those below 100 depreciation of the dinar.

²⁾ Since the beginning of 2007, the real exchange rate is calculated by using CPI (RPI earlier).

NOTE:

The average exchange rate of the dinar against a foreign currency for a particular month/year is calculated as an arithmetic mean of the official middle exchange rates applicable on working days during that month/year.

¹⁾ The National Bank of Serbia ceased to organize daily fixing session in June 2007.

²⁾ Data on purchase and sale of foreign exchange and foreign cash are available, classified by the transactions with residents and nonresidents from September 2008.

³⁾ In April 2010 the National Bank of Serbia ceased to work with authorised exchange dealers.

⁴⁾ Natural persons - residents and nonresidents; Legal entities - residents

NOTE:

The data include the amount of foreign cash which have been bought and sold by authorised exchange dealers to natural persons. These authorised exchange dealers use the software-technological application of the bank for performing exchange operations.

Source: National Bank of Serbia

NOTE: External debt of the Republic of Serbia is calculated on a due-for-payment basis and includes the amount of debt under principal and the amount of accrued interest which is not paid at the agreed due date.

¹⁾ External debt of the public sector of the Republic of Serbia comprises government debt (including debt of Kosovo&Metohija under loans concluded before the arrival of the KFOR mission, non-regulated debt towards Libya and clearing debt towards former Czechoslovakia), debt of the National Bank of Serbia, local governments, state funds and agencies, and government-guaranteed debt.²⁾ External debt of the private sector of the Republic of Serbia comprises debt of banks, enterprises and other sectors which is not government-guaranteed. External debt of the private sector does not include loans concluded before 20 December 2000 in respect of which no payments are made (EUR 885.1 million, of which EUR 395.4 million relating to domestic banks and EUR 489.7 million to domestic enterprises).

Source: Central Registry of Compulsory Social Insurance, Statistical Office of the Republic of Serbia, National Employment Service, National Bank of Serbia.

¹⁾ Number of employees in legal entities and the number of entrepreneurs and their employees (excluding registered individual farmers).

²⁾ Unemployed persons are considered as of July 2004, in accordance with law, to be only active unemployed persons and not all persons on the NES records.

³⁾ Since 2018, wages are according to the new methodology and based on the records of the Tax Administration (before 2018-the old methodology and source).

⁴⁾ Unit labour cost calculated by National Bank of Serbia.

¹⁾ Includes local government.²⁾ The increase in foreign currency claims of the NBS is the result of the acquiring of these claims based on the distribution of the bankruptcy funds. National Bank of Serbia, on the basis of law and contracts, performs activities for the Republic of Serbia, such as the management of dinar and foreign currency accounts, fiscal agent activities and implementation of tasks related to withdrawal of funds and repayment of foreign liabilities.

NOTE:

A new Chart of Accounts for banks and other financial organizations adjusted to International Accounting Standards came into force on 31 December 2014.

Explanatory Notes to Tables

Definitions of monetary aggregates and other financial instruments are harmonised with the System of National Accounts and monetary and financial statistics used by the IMF in presenting data for all countries in the IFS statistical publication. The methodology was changed several times over the past years, in order to be harmonised with international standards of statistical reporting.

– In July 2008, the new Chart of Accounts for Banks and Other Financial Organizations came into force, entailing significant harmonisation of data collection methodologies.

– The implementation of a new decree on the classification of activities, which came into force in August 2010, reflected on the manner of disclosing data in the publication, and substantial changes in data series were made in line with the decree.

– In December 2014, the new Chart of Accounts for Banks and Other Financial Organizations came into force, aligned with the International Accounting Standards. Since then, the category “Cash loans” in the household sector is shown separately and is excluded from the category “Other loans”.

– In January 2018, the new Chart of Accounts came into force in order to ensure the necessary structure of data for the purpose of enabling the application of the IFRS 9 in banks and the NBS. It is possible to record data on the stock of loans and deposits indexed to the NBS key policy rate, BELIBOR interest rates, as well as FX indexations to EURIBOR interest rates of different maturity. Additional currencies were introduced, such as CNY and RUB, as well as currencies of EU member states which have still not accepted the euro (SKK, DKK and etc). Legal entities were divided by size in accordance with provisions of the law governing accounting.

In the prior period, harmonisation with the System of National Accounts (SNA2008) and the European System of Accounts (ESA2010) was performed several times, which is why sectoral classification of institutional units was changed. Division was made by institutional sectors, in line with the European System of Accounts, which resulted in breaks in data time series; hence, the following changes were introduced as of December 2014:

– Related institutional units subject or not subject to consolidation (finance and insurance sectors, public enterprises, companies, foreign persons and other clients) are distributed to the appertaining sectors and are no longer presented separately.

–The criteria for classifying companies as a public enterprise or a company are the following: ownership,

control and management. Therefore, at the end of 2014, loans to public enterprises took up a larger share in total loans compared to previous years.

– Due to the reclassification of the Deposit Insurance Agency from the insurance sector (other financial organisations) to the government sector, since June 2016 there has been an increase in government FX deposits with the NBS and a decrease in government FX deposits with other financial organisations. To ensure comparability of data series, statistical data from December 2014 onwards were revised to accommodate the said reclassification.

I MONETARY AND FINANCIAL STATISTICS

(Tables 1.1.1 to 1.3.14, 2.5, 2.6)

1 Monetary Statistics

(Tables 1.1.1 to 1.1.21, 2.5, 2.6)

Compilation and analysis of monetary statistics in Serbia is a responsibility of the National Bank of Serbia (NBS). Monetary statistics comprises balance sheets of the NBS and other depository institutions, and the consolidated balance sheet of the banking sector. Data in balance sheet surveys and tables derived from balance sheets are classified by institutional sector (domestic and external sectors) and financial instrument.

Classification of domestic sectors used in monetary statistics is the following:

- 1) Finance and insurance sector,
- 2) Corporate sector (nonfinancial corporations),
- 3) Public sector,
- 4) Household sector, and
- 5) Other clients (nonprofit institutions serving households).

The finance and insurance sector includes corporations engaged in financial intermediation (banks and other financial institutions). Banks include the NBS and other depository institutions. Other financial institutions include: insurance companies, pension funds, financial leasing, auxiliary activities in the provision of financial services and insurance (companies managing pension and investment funds, Belgrade Stock Exchange, Central Securities Depository and Clearing House, Securities Commission, broker-dealer companies, exchange offices – at present, through banks only), holding companies, investment funds, money funds and

other lending and financing services.

The corporate sector (enterprises) comprises public enterprises and companies. Public enterprises are founded by the state and perform activities in the general (public) interest. Enterprises also include banks' clients in health care and education areas not financed from the budget (private clinics, hospitals, schools and other institutions that charge fees to cover operating costs).

The public sector (state) includes the Republic of Serbia (budget, administration and funds), the State Union Serbia and Montenegro, until its accounts were abolished, and local levels of government (provincial and municipal budgets and funds). Data for the state union show joint income and expenditures of the constituent republics. The household sector includes domestic natural persons, foreign natural persons – residents, private households with employed persons, registered agricultural producers and entrepreneurs.

The sector of other clients (nonprofit institutions serving households) comprises legal entities and natural persons registered for producing goods and services for political or business purposes which are not profit oriented (humanitarian, philanthropic and trade associations, employers' associations and other associations promoting interests of social groups that control or finance them). This category includes trade unions, professional associations (other than financial sector association) and academic societies, consumer protection associations, political parties, churches, religious communities, cultural, recreational and amateur sports clubs, voluntary organizations.

Data on claims and liabilities refer to position at the end of period, in millions of dinars, with foreign exchange positions expressed in the dinar equivalent value at the daily middle rate of exchange at the end of the period.

Main Monetary Aggregates

(Tables 1.1.1; 1.1.2; 1.1.4; 1.1.5 and 1.1.17 to 1.1.19)

The above tables show data on the main monetary aggregates: money supply and reserve money according to the narrow and broad definitions. Money supply M1 consists of currency in circulation and funds in giro, current and other accounts belonging to the owners of money balances in banks' liabilities, including money balances in the accounts of local government bodies, i.e. accounts from which payments can be made without any restrictions.

Money supply M2, in addition to M1, includes other dinar deposits, both short- and long-term.

Money supply M3, in addition to M2, includes short- and long-term foreign currency deposits (without the so called frozen foreign currency savings).

Dinar reserve money, i.e. reserve money according to the narrow definition, consists of currency in circulation, bank dinar reserves and dinar reserves of other sectors if they are held with the NBS.

Reserve money according to broader definition also includes foreign currency deposits of banks with the NBS.

Balance Sheet of the NBS

(Table 1.1.2)

The balance sheet of the NBS encompasses all claims and liabilities of the NBS resulting from its operations in the country and its relations with the rest of the world. Flows in reserve money creation are shown on the assets side, and on the liabilities side, types of reserve money holdings. The following claims and liabilities of the NBS are shown in individual columns:

Assets

Foreign exchange reserves (Column 4) includes monetary gold, special drawing rights (SDRs), foreign exchange and foreign cash, as well as foreign securities. Other foreign assets (Column 5) includes non-convertible currency and other short-term claims on the rest of the world. NBS claims on the Government include dinar and foreign currency claims of the National Bank of Serbia on the Government. Claims on banks (Column 12) comprises short- and long-term dinar and foreign currency claims on banks. Claims on public enterprises, non-banking financial organizations and other sectors are disclosed separately. Other assets (Column 20) shows other claims (different claims in course of settlement, prepayments and accrued income, funds in transit and suspense accounts, capital assets, etc.).

Liabilities

Foreign exchange liabilities of the NBS (Column 3) comprise disbursement of IMF credit and credits from other foreign creditors, due obligations towards the IMF, as well as other short- and long-term obligations to nonresidents. Dinar reserve money (Column 13), i.e. dinar liabilities of the NBS, includes currency in circulation and bank dinar reserves with the NBS (required reserves of banks, and excess reserves, which comprise banks' giro-accounts and vault cash as well as excess deposit money), dinar reserves of other sectors, primarily local governments. Banks' required reserves in foreign currency and other foreign currency deposits of banks with the NBS are included in the broad definition of reserve money (Column 15). Government deposits, time and other dinar deposits of other sectors, and limited deposits that refer mostly to assets of banks undergoing liquidation, are disclosed separately. Liabilities of the National Bank of Serbia in respect of

repo transactions are also disclosed separately, as are capital accounts and IMF accounts with the National Bank of Serbia.

Other liabilities show other obligations in course of settlement, accruals and deferred income etc.

Balance Sheet of Banks

(Table 1.1.3)

The balance sheet of banks comprises claims and liabilities of banks operating in the territory of the Republic of Serbia. The balance sheet is aggregate, i.e. includes interbank claims and liabilities, and liabilities and claims in respect of the National Bank of Serbia.

The following claims and liabilities are shown in separate columns:

Assets

Foreign exchange claims (Column 3) covers foreign currency accounts with banks abroad (Column 1) and other claims on the rest of the world (Column 2).

Claims on government (Column 6) includes claims on the Republic of Serbia, excluding local government bodies.

Claims on the NBS (Column 15) includes dinar and foreign currency assets banks hold with the NBS.

Claims on other clients (Column 22) includes dinar and foreign currency credits and other claims of banks on enterprises, households, local government bodies and other clients.

Claims are disclosed in gross amounts, i.e. they are not reduced by allowances for impairment.

Fixed and other assets (Columns 24 and 25) include capital assets and other claims, such as claims in course of settlement, prepayments and accrued income, claims from internal relationships, etc.

Liabilities

Foreign exchange liabilities (Column 1) covers obligations under short- and long-term loans and deposits in foreign currency to nonresidents.

Demand deposits (Column 11) are shown by sector and represent funds in their accounts (transaction deposits), from which direct payments are effected (gyro and current accounts and other transaction deposits).

Dinar savings and time deposits, as well as foreign currency deposits, are shown by sector and by account

holder.

Liabilities to the NBS (Column 26) comprises dinar and foreign currency liabilities to the NBS.

Capital and reserves are disclosed separately, as are provisions for loan losses and other losses. Other liabilities include different liabilities that could not be classified by instrument.

Consolidated Banking System Balance Sheet

(Table 1.1.4)

Consolidated bank balance sheet includes all claims and liabilities of the National Bank of Serbia and banks on the rest of the world and non-banking sectors in the country. Claims and liabilities between the National Bank of Serbia and banks, and interbank claims and liabilities are consolidated, i.e. offset.

Assets show claims on the rest of the world and domestic clients, while liabilities show obligations to the rest of the world and domestic clients. Deposits are grouped in monetary aggregates M1, M2 and M3.

Monetary Survey

(Table 1.1.5)

Monetary survey gives an overview of money creation and withdrawal based on the consolidated banking system balance sheet. Claims and liabilities to the rest of the world are disclosed in both gross and net amounts, i.e. claims and liabilities are offset.

Net domestic assets include net claims on government, i.e. claims on government less government deposits with the banking sector, credits to other sectors and other net assets.

Liabilities show monetary aggregates, capital accounts and provisions for loan losses and other losses.

Non-Monetary Sectors Deposits with Banks

(Tables 1.1.6 to 1.1.9)

Tables 1.1.6 and 1.1.6a show data on deposits of nonmonetary sectors with banks by maturity and sector. Methodologically they correspond to deposits from Table 1.1.3.

In total dinar and foreign currency household deposits, entrepreneurs are recorded in separate columns.

Corporate deposits (Table 1.1.7) and household deposits (Table 1.1.8) are shown under deposits hedged against risk and foreign currency deposits by currency structure.

Table 1.1.9 shows data on corporate deposits by

economic activity sector. Sectoral structure is aligned with the Law on Classification of Activities and Register of Classification Units.

Total dinar and foreign currency deposits include deposits of public enterprises and companies.

Bank Claims on Non-Monetary Sectors

(Tables 1.1.10 to 1.1.16)

Tables 1.1.10 and 1.1.11 show the maturity breakdown of dinar and foreign currency bank claims on public enterprises and companies, households, local government, other financial organisations and on non-profit and other organisations.

Short-term claims (Table 1.1.10) are broken down into foreign currency and dinar claims, with dinar claims broken down further into loans, securities and claims on interest and fees.

Long-term claims (Table 1.1.11) are broken down into dinar (loans, securities and shares) and foreign currency claims.

The final columns show provisioning against losses of enterprises and households on both short- and long-term claims.

Bank claims on the corporate sector (Table 1.1.12) and households (Table 1.1.13) are shown as risk hedged dinar claims and foreign currency claims by currency.

Bank claims on the corporate sector (Table 1.1.14) include total dinar and foreign currency claims and are shown by sector of economic activity pursuant to the Law on Classification of Activities and Register of Classification Units.

In Tables 1.1.12 and 1.1.14 total bank claims on the corporate sector are composed of claims on public enterprises and claims on companies.

Table 1.1.13 shows total bank claims on households, with entrepreneurs shown in a separate column.

Tables 1.1.15 and 1.1.16 show bank claims on corporate and household sectors by purpose of loans and other claims.

Household Savings

(Table 1.1.20)

The table shows dinar and foreign currency household savings with commercial banks at the period-end.

Short-term dinars savings are shown without the stocks expressed in transaction accounts of bank clients in

dinars, while short-term foreign currency savings within demand deposits also include the stocks expressed in transaction accounts of bank clients in a foreign currency.

Composition of Household Savings

(Table 1.1.21)

The table shows dinar and foreign currency household savings by maturity. Short-term savings are broken down into demand deposits, deposits termed up to one month, three months, six months and one year, while long-term savings are broken down into deposits up to two years and five years and deposits over five years.

The table shows short-term dinar savings without the stocks expressed in transaction accounts of bank clients in dinars, while short-term foreign currency savings within demand deposits also include the stocks expressed in transaction accounts of bank clients in a foreign currency.

2 Statistics of Other Financial Intermediaries

(Tables 1.2.1 to 1.2.3)

The balance sheets of financial leasing, factoring companies and investments funds are produced on a quarterly basis and show gross book balances at the end of a quarter. Financial assets and liabilities are classified by financial instruments and sectors in accordance with the European System of Accounts ESA 2010. Financial instruments in foreign currency include FX-indexed and FX-denominated instruments.

3 Interest Rates and Dinar Exchange Rate Movements

(Tables 1.3.1 to 1.3.14)

Interest Rates of the NBS

(Table 1.3.1)

This table shows the level of interest rates which the NBS calculates and charges on placements from reserve money issue and on all other claims, as well as the rates of interest paid on the assets deposited with the NBS.

Methodological explanations of bank interest rates under the new methodology

(Tables 1.3.2 – 1.3.9)

As of September 2010, the NBS compiles and publishes interest rate statistics in accordance with the methodology prescribed by the European Central Bank. This methodology sets out the data that banks are required to record, process and submit to the NBS with a view to

monitoring the level of weighted average interest rates on loans and deposits for outstanding amounts and new business. The NBS publishes tables showing weighted average monthly interest rates offered by banks, quoted in % per annum. These rates are calculated as the weighted average of the amount of loans or deposits and the level of interest rate on certain loans and/or deposits, reported by banks to the NBS on a monthly basis.

In submitting data on the level of interest rates on loans and deposits, banks use the following three types of calculated interest rates: 1) annualised agreed rate – interest rate agreed between the bank and the client for loans and deposits, converted to yearly terms and quoted in percentages per annum (AAR); 2) narrowly defined effective rate – interest rate that on an annual basis equalises the present value of all future or existing commitments (loans or deposits, repayment of principal, interest payments), excluding any other charges agreed by the bank and the client (NDER); 3) effective interest rate for statistics – interest rate that in annual terms equals the present value of all financial commitments, existing or future, including any other charges agreed by the bank and the client (EIRS). The effective interest rate for statistics is calculated only for new business, specifically consumer and housing loans to the household sector. AAR, NDER and EIRS interest rates are derived from annual nominal rates.

Outstanding amounts include gross carrying amounts of bank loans (excluding allowances for impairment) and carrying amounts of bank deposits as at the last calendar day of the reporting month. Loans classified as NPLs and loans for debt restructuring at rates considerably below market rates are not included in outstanding amounts when reporting interest rates on loans and deposits. Interest rates on outstanding amounts are calculated as weighted average interest rates applied on the carrying amount of loans and deposits as at the last day of the reporting month.

New business includes all new loan or deposit contracts concluded between the bank and the client during the reporting month, except for loans for debt restructuring at rates considerably below market rates. Contract conclusion date is the deciding factor for qualifying and including new loan or deposit into the report on the level of bank interest rates for the reporting month. New business includes all financial arrangements whose conditions have been agreed for the first time during the reporting month, and all existing contracts whose conditions have been re-agreed with active participation of the client. Interest rates on new business represent weighted average interest rates on all new loans and deposits agreed in the reporting month.

Interest rates on new business represent weighted average interest rates on all new loans and deposits agreed in the reporting month. When calculating interest rates on new business, all interest rates applying to new contracts are taken into account, even those that may never be shown in the bank's interest rate statistics for outstanding amounts. For example, a bank and a client may agree on an interest rate to be applied to a certain amount, but the client may ultimately decide not to withdraw or deposit funds or the contract may be cancelled. In that case, the agreed interest rate and the loan or deposit amount will be included in interest rate statistics for new business but not in the interest rate statistics for outstanding amounts.

For volatile instruments (overnight deposits, deposits redeemable at notice, revolving loans, credit card debt and current account overdrafts), interest rates on outstanding amounts and new business coincide. The concept of new business for those volatile instruments does not pertain only to new business in the given month, but is extended to include total balance for these instruments. Since for volatile instruments data referring to the total balance are reported, there is no differentiation between outstanding amounts and new business. Interest rates for volatile instruments are calculated as weighted average interest rates applied to the carrying amount of those instruments on the last calendar day of the reporting month.

For the purposes of this Methodology, banks' investment into non-transferable securities that may not be traded in the secondary market is considered to be a loan. Non-transferable security is a security whose ownership is not transferable from one party to another. A bank buys a security from a client at a set price, with the firm obligation on the client's part to redeem the same (or similar) security at a set price at an agreed future time. Purchase of securities and agreeing to sell in future (reverse repo) is classified as loan business. Investment into transferable securities traded in the secondary market, e.g. shares, is treated as investment into securities, not loans, and is not shown in reports on bank lending interest rates.

From September 2010 to December 2014, the category "Other Loans" in household sector pertained to cash and other loans aggregately. As of the adoption of the Decision on the Chart of Accounts and Contents of Accounts in the Chart of Accounts for Banks and the Decision on Collection, Processing and Submission of Data on the Balance and Structure of Accounts in the Chart of Accounts, these two loan categories are shown separately. Owing to this change, as of January 2015, cash and other loans in our tables 1.3.2 and 1.3.3 are shown separately. This explains discontinuity in the level of interest rates and loan amounts in the category "Other loans" in the household sector.

Under this methodology, for the purposes of reporting on interest rates on bank loans and deposits, household sector includes households (natural persons), private entrepreneurs, farmers (registered agricultural producers) and NPISHs (non-profit institutions serving households). Non-financial sector (non-financial legal persons) includes public enterprises and companies, i.e. independent legal persons whose core activity is production of goods and non-financial services.

Interest Rates on Loans to Household Sector, by Type, Maturity and Purpose – Outstanding Amounts

(Table 1.3.2)

The table shows weighted average annual interest rates on loans to households and NPISHs (gross carrying amount) as at the last day of the reporting month. NPLs and loans for debt restructuring at rates considerably below market rates are not included.

Interest Rates on Loans to Household and Non-Financial Sectors, by Type, Maturity and Purpose – Outstanding Amounts

(Table 1.3.2a)

The table shows weighted average annual interest rates on loans to households and NPISHs and non-financial legal persons (gross carrying amount) as at the last day of the reporting month.

NPLs and loans for debt restructuring at rates considerably below market rates are not included.

Interest Rates on Loans to Household Sector, by Type, Maturity and Purpose – New Business

(Table 1.3.3)

The table shows weighted average annual interest rates on loans agreed during the reporting month, except interest rates on loans for debt restructuring which are considerably below market rates. Shown in the table are weighted average annual interest rates on loans to households and NPISHs.

Interest Rates on Loans to Household and Non-Financial Sectors, by Type, Maturity and Purpose – New Business

(Table 1.3.3a)

The table shows weighted average annual interest rates on loans agreed during the reporting month, except interest rates on loans for debt restructuring which are

considerably below market rates. Shown in the table are weighted average annual interest rates on loans to households and NPISHs and non-financial legal persons.

Interest Rates on Deposits from Household and Non-Financial Sectors, by Maturity – Outstanding Amounts

(Table 1.3.4)

The table shows weighted average annual interest rates on all deposits (carrying amount of deposits), by maturity, as at the last day of the reporting month.

Interest Rates on Deposits from Household and Non-Financial Sectors, by Maturity – New Business

(Table 1.3.5)

The table shows weighted average annual interest rates on deposits agreed during the reporting month, by maturity.

Interest Rates on Loans to Household and Non-Financial Sectors, by Currency – Outstanding Amounts

(Table 1.3.6)

The table shows weighted annual interest rates on bank loans (excluding revolving loans, current account overdrafts and credit card debt) for households and non-financial legal persons, by currency.

Interest Rates on Loans to Household and Non-Financial Sectors, by Currency – New Business

(Table 1.3.7)

The table shows weighted interest rates on loans to households and non-financial legal persons, by currency.

Interest Rates on Term Deposits from Household and Non-Financial Sectors, by Currency – Outstanding Amounts

(Table 1.3.8)

The table shows weighted annual interest rates on term deposits from households and non-financial legal persons, by currency – outstanding amounts.

Interest Rates on Term Deposits from Household and Non-Financial Sectors, by Currency – New Business

(Table 1.3.9)

The table shows weighted annual interest rates on term deposits from households and non-financial legal persons agreed during the reporting month, by currency – new business.

Bank interest rates under old methodology– data updated concluding with June 2011

(Tables 1.3.10 and 1.3.11)

Weighed Interest Rates on Bank Loans and Deposits, 2005-2011

(Tables 1.3.10 and 1.3.11)

The tables show weighted average monthly interest rates on bank loans and deposits quoted in % per annum. Data on interest rates on loans (new business) and deposits (stock of deposits as at the last day of the reporting month) are given on the basis of nominal (agreed) interest rate in dinars. Household sector includes natural persons, farmers and entrepreneurs. Dinar loans include also foreign currency-indexed loans without the possibility to disaggregate them. New business includes all loan contracts concluded in the reporting month, whose disbursement commenced in the same month. Banks' investments into securities are considered to be loans and are subject to reporting.

The table Weighted Interest Rates on Loans shows weighted average annual interest rates agreed between banks and clients for loans whose disbursement commenced in the given month. They are calculated as a weighted average of the amount of approved loans and the level of interest rate on certain loans reported by banks to the NBS on a monthly basis.

The table Weighted Interest Rates on Deposits shows weighted average interest rates at which banks calculate and pay interest on term and demand deposits of households and legal entities. Weighted average interest rates are calculated based on the data on interest rates on particular types of deposits and the stock of deposits at the end of the given month, submitted by banks to the NBS on a monthly basis.

As of September 2010, statistics of loan and deposit interest rates is fully aligned with the ECB regulations.

Interest Rates on Securities

(Table 1.3.12)

The table shows weighted interest rates at auctions organized by the National Bank of Serbia. The weight

used in calculating the average interest rate is the purchase price of the securities sold.

Weighted yield rates on RS government bills are derived from the Ministry of Finance's auction reports. The weight used in calculating the average interest rate is the market value of sold government bills (discount amount).

The weighted average yield rate on frozen foreign currency savings bonds is calculated based on the daily Belgrade Stock Exchange data on trading, prices achieved and yield to maturity.

The weight used in calculating the average yield rate is the daily volume of trading.

The Belgrade Stock Exchange calculates daily yield rates based on the closing price.

All interest rates are shown on the annual basis.

Dinar Exchange Rates against Foreign Currencies – end of period

(Table 1.3.13)

Exchange rates represent the official middle exchange rates of the dinar against foreign currencies applicable at the end of the relevant period.

Dinar Exchange Rates against Foreign Currencies – average for the period

(Table 1.3.14)

Exchange rates represent average exchange rates of the dinar against foreign currencies in a month/year, calculated as an arithmetic mean of the official middle exchange rates of the dinar against foreign currencies applicable on business days during the relevant month/year.

The nominal effective dinar exchange rate index is the weighted geometric mean of the indices of the average exchange rates of the dinar against the euro and the dollar, calculated as set out above.

The real effective dinar exchange rate index is the nominal effective exchange rate index adjusted by CPI and the weighted geometric mean of CPI in the euro area and the United States. The weights are derived as a function of the share of individual currencies in the country's total foreign exchange inflows and outflows. They currently equal 0.8 for the euro and 0.2 for the dollar. The size of the weights is subject to periodic revision.

Index value below 100 indicates depreciation (nominal and real), while index value above 100 indicates appreciation of the dinar.

II INTERNATIONAL ECONOMIC RELATIONS

(Tables 2.1 to 2.9)

Balance of Payments of the Republic of Serbia

(Tables 2.1 and 2.2)

The balance of payments is compiled according to the IMF's methodology BPM5 (Balance of Payments Manual, Fifth Edition, 1993). Data are disseminated at monthly and annual level, in EUR million. The value of transactions is recalculated from original currencies into reporting currency by applying the official middle exchange rates of the National Bank of Serbia (NBS) on the transaction date. The main data sources for compiling the balance of payments are the Statistical Office of Republic of Serbia and the reports submitted to the NBS.

Standard presentation classifies the balance of payments components into current and capital-financial transactions. The main items within current transactions are goods, services, income and current transfers. Data on exports and imports of goods are derived from customs declarations. In line with BPM5, exports and imports of goods are adjusted on grounds of coverage and valuation by applying the 3.1% coefficient established by the Statistical Office. Data on the value of exports and imports of services are based on ITRS. The undervaluation of registered FX inflows and/or outflows is estimated and incorporated in data. As regards freight transport, expenditures are increased by a part of the costs of freight and insurance services provided by non-residents for imported goods. The income account includes receipts and payments in respect of compensation of employees, and income on direct, portfolio and other investments. The main sources of data for the income account are ITRS and direct reporting. Current transfers show total value of remittances, net foreign exchange inflow pursuant to the Law on Payment Transactions in the territory of Serbia, official grants and other current transfers. The main source of data is ITRS. The inflow of remittances is increased by the amount of non-registered remittances estimated by applying NBS methodology.

Capital account includes receipts and payments under migrants' personal transfers, as well as acquisition/disposal of non-financial non-produced assets. The main sources of data are ITRS and the Statistical Office.

Financial account includes foreign direct investments, portfolio investments, other investments and changes in FX reserves. Direct investments are investments whereby the owner acquires at least a 10% ownership stake and include investments by non-residents into

resident legal entities, investments by residents into non-resident legal entities, and sale/purchase of real estate in the country and/or abroad. Direct investments comprise investments in cash and in kind, reinvested earnings and intercompany lending. The main sources of data are ITRS, direct reporting, reports on credit-financial transactions and the Statistical Office. Data on portfolio investments are derived from ITRS. Portfolio investments include: (a) up to 10% equity investments, (b) investments in debt securities and (c) investments in financial derivatives.

Other investments cover all financial transactions that cannot be classified as direct or portfolio investments. Table 3.1 shows other investments under the following items: Medium- and long-term loans, Loans to abroad, Short-term loans and deposits, Other and Banks. Medium- and long-term loans show data on effective drawings and repayments of principal under foreign loans (including drawings and repayments of IMF loans, and early repayment of principal and interest). Short-term loans to abroad show outflows on account of lending to non-residents, as well as repayments under these loans. Short-term loans and deposits include data on loans with maturity up to one year, and short-term trade credits under current oil and gas imports. The item Other comprises: advance payments on account of exports and imports of goods, loro cheques, growth in new FX savings (excluding the effect of exchange rate changes for the period 2001–2006), settled liabilities under frozen FX savings and other. The item Banks shows changes in the FX reserves of banks, excluding the effect of exchange rate changes (for the period 2001–2006).

Table 3.2 shows other investment through the following items: trade credits, financial loans, currency and deposits and other assets/liabilities. Trade credits (granted to and received from abroad) represent the difference between the physical volume of trade in goods and the collections and payments made on that account. Financial loans include short-term (up to one year) and long-term loans (over one year) granted to (assets) and received from abroad (liabilities). Currency and deposits relate to data on changes in foreign assets and liabilities of banks (excluding exchange rate changes). Past due or prepaid obligations on account of principal and interest repayments are recorded under Other assets/liabilities.

Reserve assets show changes in NBS FX reserves in the period observed excluding the effects of exchange rate changes and price changes of gold and securities.

Errors and omissions represent a residual category. In the period 1997–2000, this item covered short-term trade credits, exchange rate changes and standard errors and omissions.

Balance of Payments of the Republic of Serbia

(Tables 2.3)

The balance of payments is compiled according to the IMF's methodology BPM6 (Balance of Payments Manual, Sixth Edition, 2009). Data are disseminated at the monthly and annual level, in EUR million and USD million.

The value of transactions is recalculated from original currencies into the reporting currency by applying the official middle exchange rates of the National Bank of Serbia (NBS) on the transaction date. The main data sources for compiling the balance of payments are: reports submitted to the NBS and data of the Statistical Office of Republic of Serbia.

The standard presentation classifies the balance of payments components into current, capital and financial transactions. The main items within current transactions are: goods, services, primary income and secondary income. Names and definitions of current account transactions are harmonised with items from the System of National Accounts (SNA 2008 and ESA 2010). Data on exports and imports of goods are derived from customs declarations and reports submitted to the NBS. In line with BPM6, exports and imports of goods show only goods whose ownership changed. Data on external trade are adjusted based on coverage (merchandise, goods without customs declarations etc) and based on classification (cif/fob adjustment – by applying the 3.1% coefficient established by the Statistical Office). Data on the value of exports and imports of services are based on the ITRS, performed through banks and the NBS. The undervaluation of registered FX inflows and/or outflows is estimated and incorporated in data (transport/tourism). Financial services also include financial intermediation services indirectly measured (FISIM).

The primary income account includes collections and payments in respect of employee compensations and income in respect of investments (direct, portfolio and other investments). Direct investment income includes total profit of legal persons, i.e. dividends and reinvested earnings. Investment income excludes the value of FISIM which is included into trade in services. The main sources of data are the ITRS performed through banks and the NBS, reports on credit-financial transactions and direct reporting.

The secondary income account includes current transfers of the government and other sectors. The main sources of data are ITRS reports, data of the Statistical Office and reports of other NBS organisational units. The inflow of remittances is increased by the amount of non-registered remittances estimated by applying the NBS method.

The capital account includes receipts and payments under the acquisition of non-produced and non-financial assets, as well as other capital transfers. The main sources of data are ITRS records.

In accordance with the BMP6 methodology, items within the financial account are expressed by the assets-liabilities approach. An increase in assets/liabilities is shown with a positive sign, while a decrease is shown with a negative sign. The net value of items is obtained as a difference between assets and liabilities. The financial account separately shows: direct investments, portfolio investments, financial derivatives, other investments and reserve assets.

Direct investments are investments whereby the owner acquires at least a 10% ownership stake and include investments into equity (including reinvested earnings) and debt instruments (intercompany loans), as well as investments in cash and in kind. The main sources of data are ITRS reports, direct reporting, reports on credit-financial transactions and the Statistical Office.

Portfolio investments include investments into equity securities whereby the owner acquires less than 10% of ownership stake and debt securities. Data on portfolio investments are compiled from the ITRS performed through banks and the NBS and the Central Securities Depository and Clearing House.

Financial derivatives include transactions of all sectors in these financial instruments, apart from the NBS (contained in reserve assets). Transactions in financial derivatives are treated separately from the value of the core activity that they are connected with, which is shown under the appertaining category. Other investments cover all financial transactions that cannot be classified as direct investments, portfolio investments, financial derivatives or reserve assets. They include: other equity, currency and deposits, loans, insurance, pension and other standardised guarantee schemes, trade credit and advances, other accounts receivable/payable, and SDR allocation.

Other equity includes up to 10% of equity investment into legal persons which are not joint-stock companies. Currency and deposits include currency and deposits without exchange rate changes. Loans include short-term (up to one year) and long-term loans (over one year) approved to abroad (assets) and disbursed from abroad (liabilities). The source of data are direct reports on credit-financial transactions submitted to the NBS. Pension, insurance and standardised guarantee schemes include non-life insurance technical reserves, life insurance and annuity entitlements, pension entitlements, claims of pension funds on pension managers, entitlements to non-pension funds, and provisions for calls under standardised guarantees.

Short-term trade loans are assessed based on data on the physical movement of goods and collections/payments in this respect, while data on long-term trade loans are obtained from direct reports on credit-financial transactions. Due but outstanding liabilities or liabilities paid in advance, other than those included in trade credit and advances, are recorded under other accounts receivable/payable. The SDR allocation shows obligations of IMF members in respect of SDR allocation.

Reserve assets show changes in NBS FX reserves in the period observed, excluding the effects of exchange rate changes and price changes of gold and securities.

Errors and omissions represent a residual category (difference between shown financial transactions and transactions on current and capital accounts).

International Investment Position of the Republic of Serbia

(Tables 2.4)

The International Investment Position (IIP) of the Republic of Serbia is prepared in line with the Sixth Edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6), and the accompanying methodological documents.

The IIP is compiled quarterly and shows the stock at the period-end, stemming from performed balance of payments transactions, currency, price and other changes, and represents the stock of its external financial assets and liabilities.

Standard IIP components concern primarily assets and liabilities on the structural side, and direct investments (equity and debt instruments), portfolio investments (equity and debt securities), financial derivatives and other investments (other equity, currency and deposits, loans, insurance, pension and standardised guarantee schemes, trade credit and advances, other accounts receivable/payable and SDR allocation), and reserve assets (monetary gold, SDRs, reserve position with the IMF, other reserve assets, currency and deposits, securities, financial derivatives and other receivables) on the functional side. The definitions of standard IIP components are methodologically fully aligned with components of the balance of payments financial account. The IIP separately shows the following sectors: central banks, governments, deposit institutions other than central banks, and other sectors. IIP components (where appropriate) are also shown by maturity, with the division into short-term (up to one year) and long-term (over one year) financial assets/liabilities. The main sources of data are reports on credit-financial transactions submitted to the NBS, the ITRS performed through banks and the NBS, direct reports of enterprises,

reports of NBS monetary-financial statistics and reports on FX reserves management.

Bank Foreign Liabilities

(Table 2.5)

The table shows total foreign currency and dinar external liabilities of commercial banks, classified as short-term and long-term. External liabilities comprise liabilities under loans, deposits received, i.e. funds deposited by foreign banks with domestic banks, liabilities under securities and other liabilities, including those arising from interest and fees. Deposits include transaction deposits, demand deposits and time deposits.

Foreign Exchange Reserves

(Table 2.6)

Foreign exchange reserves of the National Bank of Serbia encompass:

- 1) Gold (Column 1), i.e. the value of gold in the treasury of the National Bank of Serbia and of gold held abroad calculated at current market prices. This value is the sum of the value of gold bars and the value of coined gold;
- 2) Special Drawing Rights (Column 2), i.e. the balance on the SDR account with the IMF;
- 3) Cash holdings, i.e. the balance of cash holdings in the treasury at the Head Office and in the treasuries of the NBS branch offices, and cash in transit and deposits held abroad, i.e. foreign exchange held in current and deposit accounts with banks abroad (Column 3);
- 4) Securities (Column 4) shows the value of the government bonds investment portfolio.

Foreign exchange reserves of banks encompass:

- 1) Cash holdings represent the balance of cash holdings in the treasury, cash vault, and in transit;
- 2) Deposits abroad represent foreign exchange held in regular foreign exchange accounts and short-term foreign currency time deposits with foreign banks;
- 3) Cheques include foreign currency cheques and cheques in foreign currency sent for collection abroad.
- 4) Foreign securities in banks' portfolio.

Foreign Exchange Market

(Table 2.7)

**Foreign Exchange Market
from 2004 to 2006**

Column 1 – the amount of foreign currency that the NBS sold to and bought from banks at the fixing session, and the amount of interbank trade concluded at the fixing session.

Column 2 – interbank trade in foreign currency and foreign cash outside of the fixing session, once counted, while the share of trade in foreign cash is less than 1%.

Column 3 – total amount of foreign currency and foreign cash that the NBS bought from and sold to banks, outside of the fixing session.

Column 4 – total amount of foreign currency that banks bought from and sold to residents/non-residents, and the total amount of foreign cash that banks bought from and sold to residents.

Column 5 – total amount of foreign cash that banks and licensed exchange dealers bought from and sold to natural persons – residents and non-residents.

Column 6 – total amount of foreign cash that the NBS bought from and sold to licensed exchange dealers.

Foreign Exchange Market from 2007

Column 1 – total amount of trade in foreign currency on spot, forward and swap interbank FX markets, once counted, and the total amount of interbank trade in foreign cash, while the share of trade in foreign cash is less than 1%.

Column 2 – total amount of foreign currency that the NBS spot sold and spot bought from banks. In June 2007, the NBS abolished everyday fixing sessions. Instead, the NBS implements interventions, when needed (via the Reuters Dealing service – as price taker, and organising spot auctions) in order to mitigate excessive daily volatility of the dinar, ensure uninterrupted functioning of the foreign exchange market, and preserve the stability of the financial system and prices in the domestic market.

Column 3 – total amount of foreign currency that the NBS swap sold and swap bought from banks. In May 2009, with the aim of supporting financial stability in the country in conditions of the international financial crisis, a possibility was introduced for the NBS to conclude with banks two-week swap transactions (EUR/RSD). These auctions are held under the calendar of regular swap auctions until end-2010. In April 2010, in order to encourage interbank swap trade in foreign currency and develop the market of hedging instruments, the NBS began to organise regular swap auctions of purchase and sale of foreign currency (EUR/RSD), with three-month maturity. In March 2013, to support more efficient banking sector liquidity management and to help overcome problems regarding restrictions in interbank trade in the money market, the

NBS began to organise two-week swap auctions of purchase and sale of foreign currency (EUR/RSD), with two-week maturity.

Column 4 – total amount of foreign currency that banks bought from and sold to residents on spot, forward and swap markets.

Column 5 – total amount of foreign currency that banks bought from and sold to non-residents on spot, forward and swap markets.

Column 6 – total amount of foreign cash that banks bought from and sold to licensed exchange dealers, natural persons – residents and non-residents, and legal persons – residents. Data also include the amount of bought and sold foreign cash to natural persons by a small number of licensed exchange dealers that use bank software for exchange transactions.

Column 7 – total amount of foreign cash that the NBS bought from and sold to licensed exchange dealers. In April 2010, the NBS concluded the process of directing licensed exchange dealers to banks and stopped operating with licensed exchange dealers.

Serbia's External Debt

(Table 2.8 and 2.9)

As of 31 May 2014, the stock of external debt was updated from 2000 until the latest reporting period. Data are published from 2000 to 2011 at the annual level, and from 2012 until the latest reporting period by month. The review of data on the stock of external debt for the previous and current year will be performed quarterly.

Serbia's external debt is calculated under the principle of outstanding debt, which includes the amount of debt under principal and the amount of calculated unpaid interest.

Table 2.8 shows debt by international, government and private creditors:

- 1) International financial organisations (IMF, World Bank, EBRD, EIB, EUROFIMA etc);
- 2) Governments and government agencies, showing separately debt towards the Paris Club creditors, foreign governments and development banks of foreign governments;
- 3) Banks within the London Club creditors;
- 4) Government securities debt (eurobonds) issued in the foreign financial market;
- 5) Other creditors (other commercial banks, financial organisations and suppliers).

Table 2.9 shows debt by debtor, i.e. sector:

1) Public sector external debt covers government debt (including debt of Kosovo and Metohija under loans concluded before the arrival of the KFOR Mission to the province, unregulated debt towards Libya and clearing debt towards the former Czechoslovakia), the National Bank of Serbia, local self-government, funds and agencies founded by the government, and government-guaranteed debt;

2) Private sector external debt covers non-government guaranteed debt of banks, enterprises and other sectors. Private sector external debt does not cover loans concluded prior to 20 December 2000, under which no payments are made.

The stock of debt is also shown by contracted maturity: short-term debt includes debt with the maturity up to one year. Debt with the maturity over this period is considered long-term.

III REAL SECTOR

(Tables 3.1 to 3.7)

Gross Domestic Product (GDP)

(Table 3.1)

As of 30 June 2005, gross domestic product of the Republic of Serbia is calculated and published on a quarterly basis by the SORS. GDP is valued at market prices, calculated on the basis of the production principle and represents the sum of gross value added of all activities, less financial intermediation services indirectly measured (FISIM), plus taxes and less subsidies on products.

Industrial Production

(Table 3.2)

The industrial production index measures physical volume of the industrial output on the basis of monthly reports on industrial production in the Republic of Serbia (IND-1). Included are both industrial enterprises and units of non-industrial enterprises engaged in industrial production. A new classification of industry was introduced as of 1 January 2011 consisting of three sectors: mining and quarrying; manufacturing; and electricity, gas and steam supply.

Stocks of finished goods in industry are taken as end-month balance.

Construction and Transport

(Table 3.3)

The value of construction works includes the cost of construction material and invested labour. It does not include payments for the purchase of land, construction design, supervision of construction works and VAT. Data on the value of construction works refer to both finished and unfinished buildings in the reporting period.

Value indices in constant prices are derived by dividing the index in current prices by the producer price indices for construction elements and embedded materials. Hours of work include regular and over-time effective hours of work of construction site workers.

The number of completed apartments refers to apartments with fully completed construction, installation and cover-up works. Data on the number of completed apartments refer to apartments completed during the reporting period.

Construction activity in the territory of the Republic of Serbia refers to the performance of construction works by contractors in the Republic of Serbia.

Trade and Catering

(Table 3.4)

Internal trade statistics comprises trade turnover in goods. All research is conducted using the sampling method. The survey covers all large, medium-sized and small companies selected by random sampling. Quarterly research covers legal entities while annual research covers entrepreneurs. Internal trade includes: wholesale and retail trade and repair of motor vehicles and motorcycles, wholesale trade except of motor vehicles and motorcycles and retail trade except of motor vehicles and motorcycles.

Data on the network and turnover of legal entities in catering are collected by regular quarterly and annual reports. Data on entrepreneurs engaged in catering are collected by a sampling method on an annual basis.

Data on turnover in tourism (the number of tourists and overnight stays) are compiled from monthly reports of catering and non-catering organizations and family caterers.

Employment and Wages

(Table 3.5)

The SORS publishes data on registered employment according to a new source – the Central Registry of Compulsory Social Insurance (CRCSI). The SORS has been using these data since end-2014. A new methodology was developed, combining data of the CRCSI and the Statistical Business Registry. The switch to the new data source has expanded the coverage of business entities and

thus the number of employees in these entities, including all employment modalities. As so far, employed persons include persons with a legal employment contract (they entered into employment for a definite or indefinite period) and persons who are engaged in independent activities or are founders of companies or entrepreneurial firms. In addition, the new source includes persons working outside the scope of employment (based on the contract for the supply of services or the contract on temporary and periodical jobs), persons engaged in agricultural activities and recorded by the CRCSI, and persons employed with the Ministry of Interior, Ministry of Defence and Security Information Agency.

The number of unemployed persons includes persons registered as unemployed according to the regular records of the National Employment Service.

Data on gross and net wages of employees in legal entities of all types of ownership are derived from the monthly statistical survey (RAD-1), while data on wages of persons employed with entrepreneurs are taken from the Tax Administration. Wages are defined in accordance with the Labour Law (RS Official Gazette, Nos 24/2005 и 61/2005). In January 2009, the SORS expanded the coverage of observation units. In addition to wages paid out to employees in legal entities, in calculating average wages, the wages paid out to persons employed with entrepreneurs are also taken into account.

The real index of unit labour costs in industry is the ratio of the real index of average gross wages to the physical volume of industrial production per employee. For the purposes of calculating unit labour costs in industry, real gross wages are nominal gross wages deflated by the index of industrial producer prices (and not by the typically applied consumer price index). Labour productivity in industry is calculated as the ratio of the physical volume of industrial production to the number of persons employed in industry. The source of data is the SORS.

Producer Prices

(Table 3.6)

Industrial producer prices are prices at which industrial producers sell their products in the domestic market to trade and other companies. These prices do not include turnover tax, discount, *cassa sconto*, etc. They include a list of more than a thousand products from 29 areas of industrial production. The research methodology is based on the principle of representativeness.

Agricultural and fishing producer prices are those at which agricultural companies and organisations sell their products in the domestic market, free seller (sale prices), and prices at which authorised companies and organisations purchase agricultural products from private farms (purchase prices). They include selected products in crop farming, fruit growing, stock breeding, domestic processing and fishing.

Consumer Prices

(Table 3.7)

Inflation is calculated based on changes in consumer prices in the Republic of Serbia according to the Laspeyres method for the calculation of the overall price index. Included are products and services purchased and used in personal consumption of the population, and the list of products and services covered is updated annually to reflect the representative structure of consumption and consumers' habits. Consumer prices are a measure of average change in the price of a standard basket of goods and services purchased by households to meet their needs. The weights used reflect the composition of household consumption. Prices are screened in 15 towns, administrative and trade centres in the Republic of Serbia (retail outlets, markets, handicraft shops, public service providers etc.).

Data in the table are presented according to derived classes of products and services defined by the EUROSTAT in accordance with the internationally accepted Classification of individual consumption by purpose, adapted to the Harmonised index of consumer prices of the European Union and the euro area (COICOP/HICP classification).

IV FISCAL SECTOR

(Tables 4.1 and 4.2)

Public Finance

(Table 4.1)

Data on consolidated public revenue and expenditure of the Republic of Serbia are provided by the RS Ministry of Finance in accordance with the IMF's Government Finance Statistics Manual.

General government fiscal balance represents the difference between the total amount of current revenue and revenue from the sale of nonfinancial assets and the total amount of current expenditure and expenses on account of acquisition of nonfinancial assets, called guarantees and acquisition of financial assets for a specific public policy purpose.

Government Net Position

(Table 4.2)

Net government position with the banking system is its net position with the National Bank of Serbia and banks, as explained in tables 1.2 and 1.3. For the sake of complete presentation of the public sector, local government bodies have also been included.

List of abbreviations and official currency codes

Abbreviations

BEC = Broad Economic Categories
BPM5 = Balance of Payments Manual, 5th Edition
BPM6 = Balance of Payments Manual, 6th Edition
CEB = Council of Europe Development Bank
CEFTA = Central European Free Trade Agreement
c.i.f. = cost, insurance and freight
CIS = Commonwealth of Independent States
COICOP = Classification of Individual Consumption by Purpose
CPI = Consumer Price Index
EBRD = European Bank for Reconstruction and Development
EC = European Commission
EFSE = European Fund for Southeast Europe
EIB = European Investment Bank
EU = European Union
EUROFIMA = European Company for the Financing of Railroad Rolling Stock
EUROSTAT = Statistical Office of the European Union
FISIM = Financial intermediation services indirectly measured
f.o.b. = free on board
FX = foreign exchange
GDP = Gross Domestic Product
HICP = Harmonized Index of Consumer Prices
IBRD = International Bank for Reconstruction and Development
ICP = International Consumer Price Index
IDA = International Development Association
IFC = International Finance Corporation
IFS = International Financial Statistics
IIP = International Investment Position
IMF = International Monetary Fund
ITRS = International Transactions Reporting System
KFOR = Kosovo Force, under the authority of the United Nations – NATO
NBS = National Bank of Serbia
NPISH = Non-profit institutions serving households
RS = Republic of Serbia
RSD = Republic of Serbia Dinar
SBA = IMF Stand-by Arrangement
SCD = Single Custom Document
SFRY = Socialist Federal Republic of Yugoslavia
SDR = Special Drawing Rights
SITC = Standard International Trade Classification
SORS = Statistical Office of the Republic of Serbia

Official currency codes

ATS = Austrian Schilling

BEF = Belgian Franc

CHF = Swiss Franc

DEM = German Mark

EUR = Euro

FRF = French Franc

GBP = British Pound

ITL = Italian Lira

JPY = Japanese Yen

NLG = Netherlands Guilder

RSD = Republic Serbia Dinar

SEK = Swedish Krona

USD = US Dollar
